Smart City Expo Bogotá

31 May. 2023
02 Jun. 2023

Cities that care, cities that innovate

Smart City Expo Bogota, promoted by Fira Barcelona Internacional and driven by the leading international event Smart City Expo World Congress with the support of the Mayor's Office of Bogota, brings together experts in smart cities who will share ideas, knowledge and solutions on how to bring smart and sustainable development to cities and the people and communities that inhabit them.

Under the slogan Cities that Care, Cities that Innovate, the event aims to position cities as catalysts for the connection between the quality of life of their citizens and urban innovation. The programme is developed by linking urban agendas and Bogotá's current moment of promoting social inclusion, diversity,

sustainability and care for its citizens, with the challenges and opportunities of digital transformation and technological innovations. This union highlights the importance of cities as connectors of innovations to combine people, knowledge and solutions for the development of our cities and territories.
