Final Workshop Metroairports

28 Mar. 2019
29 Mar. 2019

The final workshop of this pilot project will see the public presentation of the Metroairports report. A project meeting (by invitation only) will be organized on the 28, and the public presentation, open to planners and other stakeholders, on the 29th.

The Metroairports report will analyze and propose recommendations on how to improve and foster economic and social aspects (employment, economic activity, mobility, access to housing, security...) between the airport's activity and the right to the city. The project focuses on the land-side areas of airports, those areas outside of the airport perimeter that might include: economic areas, open spaces, local communities, transport related infrastructure.

For plus information, please contact mr. Guillaume Berret (gberret@metropolis.org)

- 8:30 a.m. Registration**
