Metropolis webinar: Commuting across metropolises

03 Jun. 2020

Context

One of the most required services in all urban areas of the world, **mobility** is one of the most emblematic, visible and sensitive examples of **how metropolitan governance is applied to the everyday life of citizens. Transport and its management** have a profound influence on people's access to vital activities of care, work, study and leisure, on family budgets and, consequently, on our quality of life.

Meeting mobility needs becomes more complex when territorial spaces are expanded and diversified, as is the case in **large metropolises**, requiring coordination between public administrations of different levels and sizes, as well as between private and even individual initiatives.

Mobility needs in the urban, suburban and periurban spheres aim at different solutions to mitigate negative effects on both **transport poverty and climate change**. Thus, mobility management at metropolitan scales needs to touch several planning keys at the same time to achieve the ultimate goal of **sustainable, affordable and inclusive mobility**.

In different parts of the world, although the mobility needs of metropolises in different socio-political and economic contexts may be diverse, their solutions may be similar in terms of **planning and management of public transport**.

Content

This webinar brings together **experts in mobility** from different sectors to exchange their experience and point of view in the **coordination of diverse stakeholders** in order to **deliver safe and affordable mobility** that covers the needs of citizens living **in vast metropolitan areas**, leaving no one behind and contributing to the achievement of the Global Goals.

Organized in the occasion of the celebrations of **World Bicycle Day** on **June 3**, this webinar will also be an opportunity to showcase, for the first time to the public, the two latest Metropolis publications, both focused on mobility: **Gender Keys 04** and the **Issue Paper 10**.

Program

- Metropolis Secretariat General - Welcome & methodology (3 min)
- Introduction based on the report "Mobility and the SDGs - **Philip Turner**, Sustainable Mobility expert - UITP (12 min)
- Mobility rights and claims at the metropolitan scale - **Floriea Di Ciommo**, Economist and urban analyst, PhD in transport and urban planning, member of the cooperative cambiaMO | changing MObility (15 min)
- A practical point of view - **Youngjun Han**, Associate Research Fellow of **Seoul** Institute (12 min)
- Q & A (15-20 min)
- Metropolis Secretariat General - Wrap-up & follow-up (3 min)

Who should attend

- **local government officials**, especially from mobility and transport departments
- **practitioners**
- **decision-makers**

Commuting across metropolises
03 Jun. 2020

metropolis ● **UITP** ADVANCING PUBLIC TRANSPORT

supported by: **Ajuntament de Barcelona**

The banner has a teal background with a pattern of overlapping circles. It features two circular illustrations: one of a person walking next to a train, and another of a person standing at a bus stop. The text is in white and dark teal. Logos for metropolis, UITP, and Ajuntament de Barcelona are included at the bottom.
