"Peace mapping" campaign

01 Jul. 2020

In the framework of the World Forum on Cities and Territories of Peace (that has been postponed to 2021), will be launched an online social communication campaign called "Peace mapping" ("Cartografías de Paz" in Spanish) that seeks to make the stories of peacebuilding visible from the everyday life of our cities, to strengthen resilience processes based on collective stories that reinforce peace and the Right to the City.
