WeGO Smart City Driver Workshop I

27 Aug. 2020

WeGO launched the **Smart City Driver**, WeGO's own project management framework, to help cities plan, finance and deploy their smart city projects through a range of customized smart solutions and by matchmaking with strategic partners that can assist in citywide implementation.

In the 1st workshop of the series, taking place on August 27 from 17:00 to 18:20 KST, the local government members from Cauayan City, Philippines and Kampala City, Uganda, will demonstrate hands-on how to submit projects for the Solution Finder and the Project Implementer, with a live walkthrough from the Secretariat.

Join to understand how to input your own city's data in a way that elevates your chances of identifying appropriate solutions and establishing a competitive proposal for funding and support from WeGO and its partners.

Find the Driver page here (FYI, the registration link will be available there soon)

WeGO Smart City Driver Workshop I:
Submit your project through the Activator

2020.08.27 17:00-18:20 KST | ONLINE (ZOOM)
