Nature in and across cities - metropolitan comparative study launch event

21 Oct. 2021

21 Oct. 2021

How can vegetation, water management and biodiversity conservation be included in the design of metropolitan spaces? Seizing the occasion of the UN Biodiversity Conference in Kunming (CBD COP-15), this online exchange session will promote the launch of our new metropolitan comparative study, “**Nature in and across cities: metropolitan approaches for biodiversity conservation**”, whose insights will inspire the exchange of practices and lessons learned from initiatives that bring nature back to the metropolis for all.

This event is also part of ICLEI's Cities with Nature webinar series and will take place online on Thursday, 21 October, from 6:30 to 7:30 BRT / 11:30 to 12:30 CET / 15:15 to 16:15 NPT / 20:30 to 21:30 AEDT (**click here to check your local time**).

Simultaneous interpretation will be provided (available languages: English and Spanish).

Please register here to attend.
